

optiLube™

developed by clinicians, for clinicians

sterile lubricating jelly
water soluble

optimummedical®

optiLube

sterile lubricating jelly
water soluble

Not all lubricating gels are the same.

At **Optimum Medical** we have listened to clinicians – the people who use lubricating gels every day.

OptiLube is a water soluble, sterile lubricating jelly used to aid the smooth insertion of medical devices in procedures including insertion of catheters, endoscopy, gynaecological examinations, rectal examinations and cystoscopy.

OptiLube is used in
97% of UK NHS hospitals
and **over 60 countries**

About OptiLube

- Class IIa sterile medical device
- Water soluble and pH balanced
- Adheres well to gloves and instruments
- Available in sachet, syringe or tube format to suit clinician preference and procedure requirements

OptiLube sachets

2.7g e

5g e

20g e

OM Code	NHS code	PIP code	Product Description	Inner Pack	Outer Pack
1123	NA	NA	OptiLube 2.7g Sachet	Box of 144	Case of 1440
1120	FTM 306	357-8275	OptiLube 5g Sachet	Box of 150	Case of 1500
1119	NA	NA	OptiLube 20g sachet	Box of 20	Case of 200

OptiLube sachets promote advanced infection prevention procedures; the sterile single use sachets prevent the risk of patient to patient contamination.

OptiLube syringes

6ml e

11ml e

20ml e

OM Code	NHS code	PIP code	Product Description	Inner Pack	Outer Pack
1125	FST 650	373-4357	OptiLube 6ml pre-filled syringe	Box of 25	Case of 250

OptiLube tubes

5g e

10g e

42g e

82g e

113g e

OM Code	NHS code	PIP code	Product Description	Inner Pack	Outer Pack
1124	FTM 293	362-8856	OptiLube 5g tube	Box of 48	Case of 480
1114	NA	NA	OptiLube 10g tube	Box of 30	Case of 300
1121	FTM 294	357-7012	OptiLube 42g tube	Box of 12	Case of 72
1122	FTM 299	357-8283	OptiLube 82g tube	Box of 12	Case of 72
1127	FTM 300	NA	OptiLube 113g tube	Box of 12	Case of 72

OptiLube tubes are plastic coated and pliable to allow the clinician to extract only as much jelly as required.

Unique large flip-cap enables the tube to be opened easily.

OptiLube Reach precision tubes

5g e

15g e

OM Code	NHS code	PIP code	Product Description	Inner Pack	Outer Pack
1140	NA	NA	OptiLube Reach 5g tube	Box of 36	Case of 360
1141	NA	NA	OptiLube Reach 15g tube	Box of 24	Case of 240

OptiLube Reach offers the benefits of OptiLube sterile lubricating jelly with a long reach nozzle for improved accuracy when dispensing jelly.

*"Choosing the **OptiLube** range has been a great decision for my practice and patients. The gel is high quality and consistently performs extremely well on all of the many procedures it is required for."*

Dr Donna Kershner, York, UK

*"I had cancer and my voice box was removed so I have to breathe and voice through a hole in my neck called a stoma. This became very sore and I was unable to insert the stoma stud which as you can imagine was not ideal. I became very frustrated and down in the dumps however I then discovered **OptiLube**. I now use **OptiLube** 5g sachets several times a day and I can't thank **Optimum Medical** enough - **OptiLube** has changed my life."*

Desmond Birch, Cheshire, UK

Watch UK clinicians talk about how and why they use **OptiLube** in their clinical practice.
